Table of content

- 1 x AV-230 Amplifier
- 1 x 18VDC powersupply
- 1 x 230VAC Power cable
- 1 x Audio connection cable
- 2 x speaker connectors

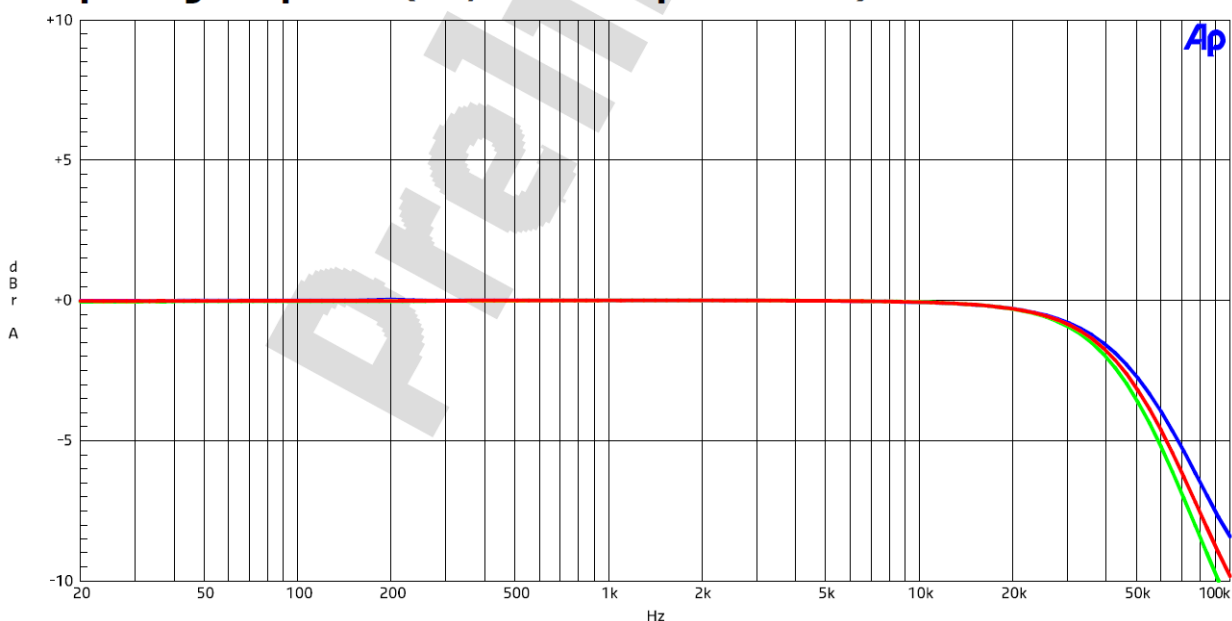

AV-230 Amplifier

Datasheet

Technical Specifications

Output power:	Stereo: 2 x 30 W (peak), 2 x 15 W (rms), 4 Ohm
External power supply:	+/- 18VDC, 0,83 A
Frequency response:	10 Hz - 50 kHz (+ 0/- 3dB)
Total harm. dist. (THD+N):	0.25%, 20Hz<f<20KHz. Pout<Pr/2
Power efficiency:	85 %
Channel separation:	85 dB
Idle power consumption:	< 1 W
Input impedance:	10KOhm
Input	Balanced Stereo
Dimensions	88 mm (W) x 68 mm (D) x 25 mm (H)
Net. Weight unit	0,128 Kg

Frequency Response (4Ω, 8Ω and open circuit)

Installation guide

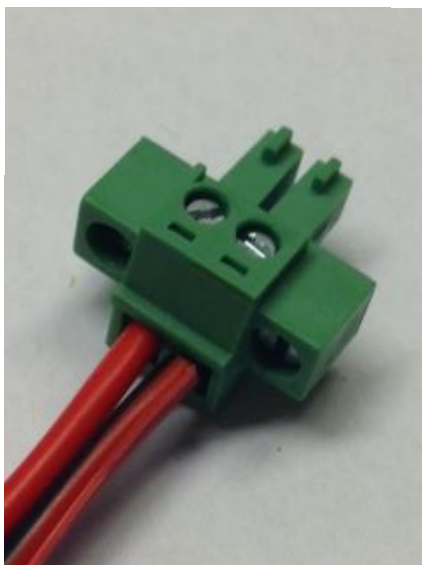

AV-230 Amplifier

Warning !

This amplifier does not have a short circuit protection.

To prevent potential damage to the amplifier, please do not connect 220VAC before connecting all cables.

Speaker cable:

Please make sure the speaker cable is pushed all the way inside the 2pin phoenix plug, similar to picture, before connecting the Plugg into the amplifier.

This will prevent short circuit of amplifier output, and potential damage to amplifier.
