

## WOOFER

## P14RC/TV

P14RC-TV is a 5" High Fidelity bass/midrange unit with a stiff and stable injection moulded metal chassis. A compensation magnet and a shielding cup are mounted on the magnet system to eliminate magnetic stray fields, hence the unit can be used very close to CRT's in Audio Video applications. The fine low frequency response and a clean uncoloured midrange of this unit make small, high quality two way systems possible. High efficiency and smooth frequency response are products of the careful matching between a polypropylene cone, a natural rubber surround and a soft PVC dust cap. A high temperature voice coil wound on an aluminium voice coil former provides high power handling capacity. The magnet system provides high sensitivity and a low Q for bass reflex applications. The P14RC-TV may also be applied as a specialized midrange in larger high quality systems.
